Industrial Graphic Overlays

Shadowgraph understands that the appearance of your product plays a vital role in how it is perceived. Our custom designed overlays are a great way to add graphics to your OEM equipment. Subsurface printed on a variety of polycarbonate or polyester materials, they provide a durable and weather resistant way to add brand identification and other important information. Shadowgraph offers a multitude of design options including selective textures, clear or colored windows, custom shapes and cut outs. A variety of adhesives are available for almost every application depending on texture, surface energy and expected environmental conditions. Each of our overlays is custom designed to meet our customers’ specific requirements.

Industry Applications

• OEM Products
• Electronic Equipment
• Medical Devices
• Oilfield Equipment
• Consumer Products
• Telecommunications
• Aviation Equipment
• ATM Machines
• AND MANY MORE…
Tags

During the day the workplace can get hectic. Employees moving about to complete their work may not be aware of hazards in their area. Danger, Warning and Caution tags can help safeguard the health of your workers. Shadowgraph manufactures durable screen-printed tags customized for applications ranging from inventory control to accident prevention and Lock Out / Tag Out.

Tags can be custom die cut, perforated, serialized, and provided with eyelets or grommets for easy attachment. Lamination adds extra protection and self-laminating covers can be added to protect user information.

Industry Applications

- Accident Prevention
- Lock Out / Tag Out
- Hazard Identification
- Inventory Control
- Leak Tags
- Parking Control
- Pool Passes
- Inspection / Repair / Maintenance
- Visitor Passes
- Hang Tags
- Scaffolding
- Biohazard
- Information Cards

Decals

When I was younger, much younger, I raced motorcycles. As a group, my friends and I collected decals. We put them on everything we owned – our bikes, toolboxes, trailers and cars. They were a way to show we were committed to our sport and the companies that made quality products for our sport. They were also a great way for companies we supported to promote their name and gain brand recognition.

Decals are still a great branding tool and can be also used in applications ranging from product identification and promotion, to safety and instruction.

Shadowgraph manufactures durable graphics printed with vibrant, weather resistant inks. With unlimited combinations of materials, colors, and finishing options, Shadowgraph creates customized decals that promote your brand, identify your products, and draw attention to your important information.

Industry Applications

- Advertising / Promotion / Branding
- Hazard Identification / Warning
- Equipment Decals
- Security Seals
- Hardhat Decals
- Safety Awareness
- Vehicle Decals
- Team Decals
- Window Decals
- Static Cling
- Cut Vinyl Lettering
- Wall Decals
- Parking Control
- Membership Decals
- Bumper Stickers

Signs and Banners

At Shadowgraph, we use our state of the art equipment and years of experience to manufacture durable, cost effective signs and banners that draw attention to your important information.

Many materials, each with their own unique advantages, are available to create signs for any application. Color matching, digital die cutting and assembly services enable us to meet each customer’s unique requirements. Photo luminescent and reflective laminates can be added to promote visibility in low light applications.

Our representative will work with you to determine the best combination of materials and processes for your custom sign or banner project.

Applications

- Bandit Signs
- Advertising
- Awards / Recognition
- Hazard Identification
- Recreation Areas
- Point of Purchase Displays
- Vehicle Magnets
- Security Signs
- Signs for Roofers / Homebuilders / Pool companies
- Team / School Yard Signs
- Trail Markers
- No Smoking Signs
- Directional Signs
About Us

At Shadowgraph, many things have changed since our humble beginnings in 1993, however our core values have remained constant. Treating people right is fundamental to how we do business. We treat our customers the way we want to be treated. We don’t spend more than we earn and we don’t waste money on things that don’t matter. We work hard, pay attention to the details, experiment and play hard. We are a team of graphic professionals with a unique mix of skills and experience that delivers results every time.

In business you make things, you do things. Whether you make medical devices or electronic equipment or use oilfield equipment or chemicals, we all have common needs when it comes to communication.

Do your customers know how to operate your device or use your product?

Do they know when and where a hazard exists? Do they know who you are?

Shadowgraph answers these questions with a variety of intelligent solutions. If your next project requires any type of identification or graphic product, please give us a call. Our goal is to understand your requirements and furnish the best graphics in the business.
Contract Printing / Custom Fabrication

Shadowgraph can print on customer provided panels and various dimensional parts. Direct printing eliminates label substrates, adhesives and application time. We use a variety of high quality direct printing methods such as screen printing, pad printing, hot stamping and digital printing to add graphics to your products.

With full or selective lamination and optically registered digital cutting and routing we manufacture non-printed products for many mechanical or electrical functions.

Industry Applications

- Spacers
- Gaskets
- Insulators
- Lenses
- Stencils

Digital Flatbed Printing

Shadowgraph’s state-of-the-art U.V. flatbed printer, with 1200 dpi and white capability, produces a wide variety of durable sign and graphic products. Near photographic printing on rigid materials such as aluminum, wood, polycarbonate, acrylic, and PVC enables us to produce stunning indoor and outdoor signage up to 4’ x 8’ in size. Our innovative digital process eliminates the need for costly mounting and lamination as well as the set up costs and volume restrictions associated with traditional printing methods.

Applications

• Exhibition Graphics
• Retail Signage
• Point of Purchase Displays
• Presentation Boards
• Floor, Ceiling, Wall Displays
• Double Sided Applications
